

## Engineering-1

### School of Engineering

*Dean:* Steven Schreiner; *Assistant Dean:* Martha H. Stella

*Click the appropriate links for [Biomedical Engineering courses](#), [Civil Engineering courses](#), [Computer & Electrical Engineering courses](#), [General Engineering courses](#), and [Mechanical Engineering courses](#).*

The School of Engineering is composed of five departments: civil engineering, electrical and computer engineering, mechanical engineering, and technological studies; and two interdisciplinary programs: engineering science, and biomedical engineering. Graduates of the engineering programs are prepared for employment at the professional level or to pursue graduate studies. The program in technological studies prepares students for positions in business, industry, and government or to be teachers of technology education.

### Engineering Degree Programs

The School of Engineering offers the following engineering academic programs leading to a bachelor's degree:

- Bachelor of Science in Biomedical Engineering
- Bachelor of Science in Civil Engineering
- Bachelor of Science in Computer Engineering
- Bachelor of Science in Electrical Engineering
- Bachelor of Science in Engineering Science (Specialization in Engineering Management)
- Bachelor of Science in Mechanical Engineering
- Bachelor of Arts in Biomedical Engineering (not accepting freshman for 2013-14 or any internal or external transfer students for 2012-13)
- Seven Year Medical/Bachelor of Science in Biomedical Engineering
- Seven Year Medical/Bachelor of Science in Engineering Science (Preferences in Electrical Engineering and Mechanical Engineering)

The School of Engineering offers the following engineering minors:

- Computer Engineering
- Electrical Engineering
- Engineering Science
- Mechanical Engineering

The Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Science and Mechanical Engineering programs are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The engineering programs prepare students for careers in research and development, design, and engineering practice. The engineering programs equip graduates for entry-level positions as engineers in industry and place them on track for professional registration. The course of study in engineering will provide the opportunity to pursue an engineering specialty in one of the following engineering disciplines: biomedical, civil, computer, electrical, or mechanical engineering, or engineering management. The programs also prepare students for admission to graduate school to continue their education toward the MS or PhD degrees in a recognized engineering or other technical specialty, and other related advanced degrees.

## **Engineering-2**

The engineering curricula provide each student with a thorough understanding of why and how things work. They develop the ability to predict the effect on a proposed or existing design of different choices in the use of materials, form, and procedures. The curricula are built on a core of general studies taken from many disciplines and taught by experts in those specific fields of study. They are also firmly based on a study of fundamental concepts in mathematics and physical sciences and taught at a high level of intellectual challenge. The curricula provide exposure to the theory of engineering and design that underlies all engineering specialties, while offering the student the opportunity to explore a particular engineering specialty in depth.

The TCNJ engineering programs provide students with considerable exposure to laboratory experiences and are supported by excellent laboratory resources. Laboratory activities help develop skills in original design and develop a student's confidence in his or her ability to critique and improve a design. The engineering programs at TCNJ are limited to undergraduate studies. Laboratories, therefore, are designed specifically for teaching, are relevant to the course material, and are kept accessible for students.

### **Mission Statement**

The mission of the School of Engineering is to develop highly competent professionals, preparing them for entry-level positions in engineering or teaching, or for further study in graduate or professional school. Allied with the College's mission, the School of Engineering is proud of its public service mandate to educate leaders of New Jersey and the nation, fostering intellectual growth of our students so that they may become productive citizens in the service of humanity. The School is dedicated to providing a dynamic learning environment that emphasizes open-ended design, problem-solving skills, teaming, communication, and leadership skills.

To accomplish its mission, the School of Engineering:

- offers a broad array of exceptional academic programs including: biomedical engineering, civil engineering, computer engineering, electrical engineering, mechanical engineering, engineering science (engineering management), and STEM education;
- engages students in creating innovative design solutions that include realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, sustainability, and global considerations, and disseminating these designs at national and regional venues;
- provides undergraduate research experiences, allowing students to work closely with members of the faculty; and
- employs highly dedicated faculty members who are effective teacher-scholars committed to maintaining a learner-centered undergraduate environment with emphasis on student mentoring.

### **Academic Policies and Standards**

A student may repeat any course without seeking approval. However, if a student wishes to repeat a course more than once, permission must be obtained from the chair of the department or coordinator of the program of study and, if appropriate, the chair of the department offering the course. Permission to repeat a major course more than once will be granted only in cases of extreme extenuating circumstances, e.g., illness, financial, etc. When an engineering course is repeated, only the most recent earned grade is counted in the grade point average, although all grades earned will appear on the student's transcript.

Seniors pursuing bachelor of science degrees in an engineering major are required to take the Fundamentals of Engineering Examination for the Professional Engineer's License.

Given the nature of the engineering curricula, it is extremely important to follow the recommended course sequence. Violations of this guideline may result in dismissal from the engineering majors.

## Engineering-3

### Program Entrance, Retention, and Exit Standards

Every major program at the College has set standards for allowing students to remain in that program, to transfer within the College from one program to another, and to graduate from a program. The following are the standards for engineering majors. Minimum grades are noted in parentheses.

- Retention in the engineering programs is based on the following performance standards in these “critical content courses”: PHY 201 (C–); PHY 202 (C–), MAT 128 (C–). A student who does not achieve these minimum performance standards, earns a grade of F, and/or has a cumulative GPA of less than 2.0 will be placed on the Engineering Programs Retention List. Placement on the Retention List for two consecutive semesters or three non-consecutive semesters will result in dismissal from the major. Students dismissed from the major may appeal for re-entry into the major.
- To ensure academic success, first year, sophomore, and first-semester junior students will not be permitted to take more than 4.5 course units unless they have a GPA of 2.75 or greater. Upper class students can register for 5.5 course units if they are in good academic standing.
- Entrance (internal transfer) into the engineering programs from another program within the College is based upon the following performance standards in these “foundation courses”: PHY 201 (C–); PHY 202 (C–), MAT 128 (C–). Internal transfer within engineering programs will be permitted as long as enrollment limits are not exceeded.
- Graduation requires an in-major cumulative GPA of 2.0.

### Biomedical Engineering

*Faculty:* Hall, Chair, Anderson, BuSha

Biomedical engineers integrate engineering skills with the understanding of the complexity of physiological systems, from the cellular level to the whole body, in order to improve healthcare. Biomedical engineers design instruments, devices, and develop computational models of physiological systems and signals. Some of the well established specialty areas within the field of biomedical engineering are: bioinstrumentation; biomaterials; biomechanics; cell and tissue engineering; medical imaging; rehabilitation engineering; and quantitative modeling of physiology. Biomedical engineers are employed in universities, in industry, in hospitals, in research facilities of educational and medical institutions, in teaching, and in government regulatory agencies.

#### Program Educational Objectives:

The biomedical engineering program has established the following educational objectives. These objectives outline what TCNJ biomedical engineers are expected to attain within the first few years after graduation.

- To contribute to the economic development of New Jersey, the nation and /or the global community through the ethical practice of engineering;
- To become successful in their chosen career path, whether it is in the practice of engineering, in advanced studies in engineering or science, or in other complementary disciplines;

## Engineering-4

- To assume leadership roles in their chosen profession through engineering ability, communication skills, teamwork, understanding of contemporary global and socio-economic issues, and/or the use of modern engineering tools;
- To enhance career skills through life-long learning.

### Student Outcomes:

The student outcomes listed below are expected of all graduates of the biomedical engineering program. These outcomes outline what TCNJ biomedical engineering graduates are expected to know and be able to do by the time of graduation. These outcomes outline the knowledge, abilities, tools, and skills the program gives the graduates to enable them to accomplish the biomedical engineering program educational objectives.

Biomedical engineering graduates will have:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design and conduct experiments, as well as to analyze and interpret data;
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams;
- an ability to identify, formulate, and solve engineering problems;
- an understanding of professional and ethical responsibility;
- an ability to communicate effectively;
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context;
- a recognition of the need for and an ability to engage in life-long learning;
- a knowledge of contemporary issues;
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
- an understanding of biology and physiology, and the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and biology;
- the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interaction between living and non-living materials and systems.

## Civil Engineering

*Faculty:* Horst, Chair, Al-Omaishi, Krstic

Civil engineers plan, design, and supervise the construction of a wide variety of facilities essential to modern life. Projects include buildings, bridges, highways, mass transit systems, airports, tunnels, dams, flood controls, water and wastewater treatment plants, and offshore structures. The civil engineering program supports the following major areas of civil engineering: structural engineering, transportation engineering, water resources engineering, geotechnical engineering, and construction management. The program offers student laboratory activities in materials testing (structural), fluids measurements (water resources), and soils testing (geotechnical), CAD drafting, and surveying.

### Program Educational Objectives

The civil engineering program has established the following educational objectives. These objectives outline what TCNJ civil engineers should be able to accomplish during the first few years after graduation.

- To contribute to the economic development of New Jersey and the nation through the ethical practice of engineering;
- To become successful in their chosen career path, whether it is in the practice of engineering, in advanced studies in engineering or science, or in other complementary disciplines;
- To assume leadership roles in industry or public service through engineering ability, communication skills, teamwork, understanding of contemporary global and socio-economic issues, and use of modern engineering tools;
- To maintain career skills through life-long learning and be on the way towards achieving professional licensure.

### Civil Engineering Program Outcomes

The program outcomes listed below are expected of all graduates of the civil engineering program. These outcomes outline what TCNJ civil engineering graduates are expected to know and be able to do at graduation. These outcomes outline the knowledge, abilities, tools, and skills the program gives the graduates to enable them to accomplish the School of Engineering educational objectives.

Civil engineering graduates will have:

- An ability to apply knowledge of mathematics, science, and engineering;
- An ability to design and conduct experiments, as well as to analyze and interpret data;
- An ability to design a system, component, or process to meet desired needs;

## Engineering-9

- An ability to function in multidisciplinary teams;
- An ability to identify, formulate, and solve engineering problems;
- An understanding of professional and ethical responsibility;
- An ability to communicate effectively;
- The broad education necessary to understand the impact of engineering solutions in a global and societal context;
- A recognition of the need for and an ability to engage in life-long learning;
- A knowledge of contemporary issues;
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;
- Apply knowledge of mathematics through differential equations, calculus-based physics, chemistry, and at least one additional area of science, consistent with the program educational objectives;
- Conduct civil engineering experiments and analyze and interpret the resulting data;
- Design a system, component, or process in more than one civil engineering context;
- Explain basic concepts in management, business, public policy, and leadership;
- Apply knowledge of four technical areas appropriate to civil engineering;
- Explain the importance of professional licensure.

## **Electrical and Computer Engineering**

*Faculty:* Hernandez, Chair, Deese, Katz, Riederer

The Department of Electrical and Computer Engineering offers academic programs leading to a Bachelor of Science in Electrical Engineering and a Bachelor of Science in Computer Engineering. The Computer Engineering and Electrical Engineering programs are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Electrical engineers are concerned with electrical devices and systems and with the use of electrical energy. Virtually every industry uses electrical engineers, and electrical engineering is the largest of all engineering disciplines. Examples of the products designed by electrical engineers range from the computers used in business to instruments used in the medical profession, military radar systems, cellular telephones, and video conferencing equipment.

The electrical engineering curriculum allows students to focus on communications, electronic devices, instrumentation, digital signal processing, and automatic control systems.

Computer engineering is a discipline that addresses a variety of technological problems associated with the design and application of computers. Computer engineering is concerned with the design and implementation of digital hardware and software.

The curriculum for the computer engineering degree provides breadth and depth across the fields of electrical engineering and computer science. The curriculum structure provides a balanced view of hardware, software, hardware-software trade-offs, and basic modeling techniques used to represent the computing process. The degree requirements include completion of coursework from the computer science as well as the electrical and computer engineering departments.

### **Electrical and Computer Engineering Educational Objectives**

The Department of Electrical and Computer Engineering at The College of New Jersey seeks to prepare its graduates:

- To contribute to the economic development of New Jersey and the nation through the ethical practice of engineering;
- To become successful in their chosen career path, whether it is in the practice of engineering, in advanced studies in engineering or science, or in other complementary disciplines;

## Engineering-12

- To assume leadership roles in industry or public service through engineering ability, communication skills, teamwork, understanding of contemporary global and socio-economic issues, and use of modern engineering tools;
- To maintain career skills through life-long learning and be on the way towards achieving professional licensure.

## Electrical and Computer Engineering Program Outcomes

The program outcomes listed below are expected of all graduates of the electrical and computer engineering programs. These outcomes outline what TCNJ electrical and computer engineering graduates are expected to know and be able to do at graduation. These outcomes outline the knowledge, abilities, tools, and skills the programs give the graduates to enable them to accomplish the School of Engineering educational objectives.

Electrical and computer engineering graduates will have:

- An ability to apply knowledge of mathematics, science, and engineering;
- An ability to design and conduct experiments, as well as to analyze and interpret data;
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- An ability to function in multidisciplinary teams;
- An ability to identify, formulate, and solve engineering problems;
- An understanding of professional and ethical responsibility;
- An ability to communicate effectively;
- The broad education necessary to understand the impact of engineering solutions in a global and societal context;
- A recognition of the need for and an ability to engage in life-long learning;
- A knowledge of contemporary issues;
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;
- An ability to analyze and design complex electrical and electronic devices; and
- An ability to analyze and design software and systems containing hardware and software components.

\*\* *Only one course unit taken as part of the student's major may also be counted toward the student's minor.*

### Engineering Science

Engineering science is an interdisciplinary program leading to a Bachelor of Science in Engineering Science with a specialization in engineering management. The Engineering Science program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

#### Program Educational Objectives

The engineering science program has established the following educational objectives. These objectives outline what TCNJ engineers should be able to accomplish during the first few years after graduation.

- To contribute to the economic development of New Jersey and the nation through the ethical practice of engineering;
- To become successful in their chosen career path, whether it is in the practice of engineering, in advanced studies in engineering or science, or in other complementary disciplines;
- To assume leadership roles in industry or public service through engineering ability, communication skills, teamwork, understanding of contemporary global and socio-economic issues, and use of modern engineering tools;
- To maintain career skills through life-long learning and be on the way towards achieving professional licensure.

### Engineering Science/Engineering Management Specialization

The engineering management specialization integrates engineering and management education to prepare students for engineering management. Graduates of this program are prepared to work as first-line supervisors or plant managers. This course of study provides students with the technical knowledge that first-line supervisors need along with expertise in accounting, finance, production, marketing, and personnel. It includes courses from the engineering programs and departments as well as the School of Business. Engineering management students must select either the electrical engineering or mechanical engineering preference for their studies.

## Engineering-18

### Engineering Science/Engineering Management Specialization Program Outcomes

The program outcomes listed below are expected of all graduates of the engineering science/engineering management specialization program. These outcomes outline what TCNJ engineering science graduates are expected to know and be able to do at graduation. These outcomes outline the knowledge, abilities, tools, and skills the program gives the graduates to enable them to accomplish the School of Engineering educational objectives.

Engineering science/engineering management specialization graduates will have:

- An ability to apply knowledge of mathematics, science, and engineering;
- An ability to design and conduct experiments, as well as to analyze and interpret data;
- An ability to design a system, component, or process to meet desired needs;
- An ability to function in multidisciplinary teams;
- An ability to identify, formulate, and solve engineering problems;
- An understanding of professional and ethical responsibility;
- An ability to communicate effectively;
- The broad education necessary to understand the impact of engineering solutions in a global and societal context;
- A recognition of the need for and an ability to engage in life-long learning;
- A knowledge of contemporary issues; and
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

## Mechanical Engineering

*Faculty:* Sepahpour, *Chair,* Chang, Facas, Flynn, Grega, Paliwal, Shih, Wang, Yan

The Department of Mechanical Engineering offers an academic program leading to a Bachelor of Science in Mechanical Engineering. The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

## **Engineering-23**

This program encompasses course work in two areas of study: energy, which includes courses in thermodynamics, fluid mechanics, and heat transfer; and engineering design, with courses in strength of materials and mechanical design. The mechanical engineering degree allows for additional courses in a variety of specialized areas.

Encompassing the broadest of all engineering disciplines, the mechanical engineering program teaches students how to apply the principles of mechanics and energy to design anything from automobile engines to rocket engines and nuclear reactors. Mechanical engineers design and operate power plants and are concerned with the conversion of one form of energy to another. They also design heating, ventilating, and air conditioning systems to provide controlled conditions of temperature and humidity in homes, offices, commercial buildings, and industrial plants. Besides developing equipment and systems for refrigeration of foods and the operation of cold storage facilities, these engineers also are involved with the production of energy from alternative sources such as solar, geothermal, and wind.

### **Program Educational Objectives**

The mechanical engineering program has established the following educational objectives. These objectives outline what TCNJ mechanical engineers should be able to accomplish during the first few years after graduation.

- To contribute to the economic development of New Jersey and the nation through the ethical practice of engineering;
- To become successful in their chosen career path, whether it is in the practice of engineering, in advanced studies in engineering or science, or in other complementary disciplines;
- To assume leadership roles in industry or public service through engineering ability, communication skills, teamwork, understanding of contemporary global and socio-economic issues, and use of modern engineering tools;
- To maintain career skills through life-long learning and be on the way towards achieving professional licensure.

### **Mechanical Engineering Program Outcomes**

The program outcomes listed below are expected of all graduates of the mechanical engineering program. These outcomes outline what TCNJ mechanical engineering graduates are expected to know and be able to do at graduation. These outcomes outline the knowledge, abilities, tools, and skills the program gives the graduates to enable them to accomplish the School of Engineering educational objectives.

Mechanical engineering graduates will have:

- An ability to apply knowledge of mathematics, science, and engineering;
- An ability to design and conduct experiments, as well as to analyze and interpret data;
- An ability to design a system, component, or process to meet desired needs;
- An ability to function in multidisciplinary teams;
- An ability to identify, formulate, and solve engineering problems;
- An understanding of professional and ethical responsibility;
- An ability to communicate effectively;

## Engineering-24

- The broad education necessary to understand the impact of engineering solutions in a global and societal context;
- A recognition of the need for and an ability to engage in life-long learning;
- A knowledge of contemporary issues;
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;
- An ability to apply advanced mathematics through multivariate calculus and differential equations;
- Familiarity with statistics, linear algebra, and numerical methods;
- A knowledge of chemistry and calculus-based physics with depth in at least one of them; and
- An ability to work professionally on both thermal and mechanical systems areas including the design and realization of such systems.

**Total course units**

**5\*\* course units**

\* Mechanical engineering elective must be chosen from the following: MEC 343, MEC 421, MEC 431, MEC 481.

\*\* Only one course unit taken as part of the student's major may also be counted toward the student's minor.

### Minor in Mechanical Engineering

#### Option B—Thermal Systems

ENG 222/Statics	1 course unit
ENG 322/Thermodynamics	1 course unit
MEC 361/Fluid Mechanics	1 course unit
MEC 411/Heat Transfer	1 course unit
Mechanical Engineering Elective*	1 course unit

**Total course units**

**5\*\* course units**

\* Mechanical engineering elective must be chosen from the following: MEC 371, MEC 451, MEC 461, MEC 471.

\*\* Only one course unit taken as part of the student's major may also be counted toward the student's minor.

**Bachelor of Arts in Biomedical Engineering** (*Program is not accepting freshman for 2013-14 or internal or external transfer students for 2012-13*)

**Seven Year Medical/Engineering**

The School of Engineering offers a combined seven-year medical/engineering program in conjunction with the New Jersey Medical School (NJMS) of the University of Medicine and Dentistry of New Jersey (UMDNJ). Students in the program can pursue undergraduate studies leading to a Bachelor of Science in Engineering Science (preferences in Electrical Engineering and Mechanical Engineering are available) or a Bachelor of Science in Biomedical Engineering. The Bachelor of Science in Engineering Science program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Students in this program spend three years at TCNJ completing undergraduate coursework. Upon successful completion of the first year of medical school, the student is granted a Bachelor of Science in Engineering Science or a Bachelor of Science in Biomedical Engineering from TCNJ. The MD degree is earned at the end of four years at NJMS.

For consideration into the program, the candidates must have earned a minimum SAT score of 1480 or better (from a single test), and hold a class rank within the top 5-10 percent. Students entering this program must hold advanced placement credit for Calculus A and Calculus B, and complete General Physics I and II in the summer prior to their first semester. Retention in the program requires students to carry an overall and semester GPA of 3.50 or higher and earn a B or better in the required science and engineering courses. Two interviews are required as part of the admissions process.

MAT	229/Multivariable Calculus	1 course unit
ENG	212/Circuits Analysis	1 course unit
ENG	214/Circuits Analysis Laboratory	.5 course unit
ENG	262/Dynamics	1 course unit

#### Sophomore Year

##### Fall

ENG	093/Engineering Seminar III	0 course unit
ENG	232/Manufacturing Processes	1 course unit
ENG	322/Thermodynamics	
ENG	342/Advanced Engineering Mathematics II	1 course unit
IDS	252/Society, Ethics and Technology	1 course unit
CSC	215/Computer Science I	1 course unit

##### Spring

ENG	152/Materials Science	1 course unit
TST	161/Creative Design	1 course unit
MEC	251/Strength of Materials	1 course unit
MEC	263/Mechanical Engineering Lab I	.5 course unit
MEC	361/Fluid Mechanics	1 course unit
ECO	101/Principles of Microeconomics	1 course unit
ENG	094/Engineering Seminar IV	0 course unit

## Engineering-30

### Junior Year

#### Summer

CHE	331/Organic Chemistry I	1 course unit
CHE	332/Organic Chemistry II	1 course unit

#### Fall

ENG	352/Control Systems	1 course unit
ENG	354/Control Systems Laboratory	.5 course unit
ELC	495/Senior Project I	0 course unit
ENG	099/Senior Professional Seminar	0 course unit
MEC	311/Mechanical Design I	1 course unit
BIO	231/Genetics	1 course unit
	Mechanical Engineering Elective**	1 course unit

#### Spring

ENG	372/Engineering Economy	1 course unit
ELC	496/Senior Project II	1 course unit
ENG	098/Fundamentals of Engineering Review	0 course unit
ENG	312/Digital Circuits and Microprocessors	1 course unit
	Mechanical Engineering Elective**	1 course unit
	Liberal Learning Elective**	1 course unit

#### Total course units at TCNJ

**33.5 course units**

\* Students entering the program must hold advanced placement credit in Calculus A and B. Alternatively, students must hold advanced placement credit for General Physics I and II, and complete Calculus A and B during the summer prior to their first semester at TCNJ.

\*\* By advisement only.

### Senior Year at New Jersey Medical School\*\*\*

\*\*\* One Liberal Learning course requirement is met at New Jersey Medical School.

## Seven-Year BS in Biomedical Engineering (Electrical Preference)/MD

### First Year

#### Summer

PHY	201/General Physics I*	1 course unit
PHY	202/General Physics II*	1 course unit

#### Fall

ENG	142/Fundamentals of Engineering Design	1 course unit
ENG	095/Introduction to Engineering	0 course unit
ENG	091/Engineering Seminar I	0 course unit
FSP	First Seminar (Social Sciences)**	1 course unit
BIO	185/Themes in Biology	1 course unit
ENG	272/Advanced Engineering Mathematics I	1 course unit
TST	161/Creative Design	1 course unit

\* Students entering the program must hold advanced placement credit in Calculus A and B, and complete General Physics I and II during the summer prior to their first semester at TCNJ.

\*\* By advisement only. One Liberal Learning course requirement is met at New Jersey Medical School.

## Engineering-31

### Spring

ENG	092/Engineering Seminar II	0 course unit
MAT	229/Multivariable Calculus	1 course unit
ENG	212/Circuits Analysis	1 course unit
ENG	214/Circuits Analysis Laboratory	.5 course unit
CSC	215/Computer Science I	1 course unit
IDS	252/Society, Ethics and Technology	1 course unit
ECO	101/Principles of Microeconomics	1 course unit

### Sophomore Year

#### Summer

CHE	201/General Chemistry I	1 course unit
CHE	202/General Chemistry II	1 course unit

#### Fall

BME	311/Physiological Systems	1 course unit
BME	333/Physiological Systems Laboratory	.5 course unit
ENG	312/Digital Circuits and Microprocessors	1 course unit
ENG	093/Engineering Seminar III	0 course unit
ENG	372/Advanced Engineering Math II	1 course unit
ENG	372/Engineering Economy	1 course unit

#### Spring

ELC	321/Signals and Systems	1 course unit
ELC	251/Electronics	1 course unit
ELC	333/Electrical Engineering Laboratory I	.5 course unit
BME	251/Introduction to Biomedical Engineering	1 course unit
ENG	094/Engineering Seminar IV	0 course unit
BME	371/Physiological Systems II	1 course unit
BIO	231/Genetics	1 course unit

### Junior Year

#### Summer

CHE	331/Organic Chemistry I	1 course unit
CHE	332/Organic Chemistry II	1 course unit

#### Fall

ENG	099/Senior Professional Seminar	0 course unit
BME	423/Introduction to Biomaterials	1 course unit
ELC	423/Digital Signal Processing	1 course unit
ELC	433/Electrical Engineering Laboratory III	.5 course unit
ENG	322/Thermodynamics	1 course unit
ENG	352/Control Systems	1 course unit
ENG	495/Senior Project I	0 course unit
BME	4xx/Biomedical Engineering Elective	1 course unit

#### Spring

BME	473/Bioinstrumentation	1 course unit
ENG	098/Fundamentals of Engineering Review	0 course unit

## Engineering-32

BME 496/Senior Project II	1 course unit
BME 4xx/Biomedical Engineering Elective	1 course unit
Engineering Elective (3xx or 4xx)	1 course unit
Liberal Learning Elective**	1 course unit

**Total course units at TCNJ**

**37\*\*\* course units**

## Senior Year at New Jersey Medical School\*\*

\*\*\* Total course units, including AP credit, are 39.

## Seven-Year BS in Biomedical Engineering (Mechanical Preference)/MD

### Freshman Year

#### Summer

PHY 201/General Physics I*	1 course unit
PHY 202/General Physics II*	1 course unit

\* Students entering the program must hold advanced placement credit in Calculus A and B, and complete General Physics I and II during the summer prior to their first semester at TCNJ.

#### Fall

ENG 142/Fundamentals of Engineering Design	1 course unit
ENG 095/Introduction to Engineering	0 course unit
ENG 091/Engineering Seminar I	0 course unit
FSP First Seminar (Social Sciences)**	1 course unit
BIO 185/Themes in Biology	1 course unit
ENG 272/Advanced Engineering Mathematics I	1 course unit
ENG 212/Circuits Analysis	1 course unit
ENG 214/Circuits Analysis Laboratory	.5 course unit

\*\* By advisement only. One Liberal Learning course requirement is met at New Jersey Medical School.

#### Spring

ENG 092/Engineering Seminar II	0 course unit
MAT 229/Multivariable Calculus	1 course unit
CSC 215/Computer Science I	1 course unit
ELC 251/Electronics	1 course unit
ELC 333/Electrical Engineering Laboratory I	.5 course unit
IDS 252/Society, Ethics and Technology	1 course unit

### Sophomore Year

#### Summer

CHE 201/General Chemistry I	1 course unit
CHE 202/General Chemistry II	1 course unit

#### Fall

BME 311/Physiological Systems	1 course unit
BME 333/Physiological Systems Laboratory	.5 course unit
ENG 222/Statics	1 course unit
ENG 093/Engineering Seminar III	0 course unit

## Engineering-33

ENG	342/Advanced Engineering Math II	1 course unit
ENG	372/Engineering Economy	1 course unit
ECO	101/Principles of Microeconomics	1 course unit

### Spring

BME	251/Introduction to Biomedical Engineering	1 course unit
ENG	094/Engineering Seminar IV	0 course unit
TST	161/Creative Design	1 course unit
MEC	251/Strength of Materials	1 course unit
MEC	263/Mechanical Engineering Lab I	.5 course unit
BIO	231/Genetics	1 course unit
BME	371/Physiological Systems II	1 course unit

## Junior Year

### Summer

CHE	331/Organic Chemistry I	1 course unit
CHE	332/Organic Chemistry II	1 course unit

### Fall

BME	423/Introduction to Biomaterials	1 course unit
MEC	311/Mechanical Design I	1 course unit
ENG	099/Senior Professional Seminar	0 course unit
ENG	322/Thermodynamics	1 course unit
MEC	361/Fluid Mechanics	1 course unit
BME	4xx/Biomedical Engineering Elective	1 course unit
BME	495/Senior Project I	0 course unit

### Spring

ENG	098/Fundamentals of Engineering Review	0 course unit
BME	473/Bioinstrumentation	1 course unit
BME	343/Biomechanics	1 course unit
BME	496/Senior Project II	1 course unit
BME	4xx/Biomedical Engineering Elective	1 course unit
	Liberal Learning Elective**	1 course unit

**Total course units at TCNJ**

**37\*\*\* course units**

## Senior Year at New Jersey Medical School\*\*

\*\*\* Total course units, including AP credit, are 39.
