Educational Administration and Secondary Education

Faculty: Norris, Chair; Farber, Gosselin, Gordon, Leake, O’Connor, Palmer, Rodriguez, Seaton, Wright

The Department of Educational Administration and Secondary Education provides a sequence of undergraduate courses and experiences that support the preparation of students matriculated in secondary education track programs in biology, chemistry, physics, Spanish, mathematics, social studies, and English. Department courses and programs are guided by the Conceptual Framework of The School of Education, the New Jersey Administrative Code and State Standards, and national accrediting organizations.

Secondary Teacher Education Program

An overview of the entire secondary-level teacher preparation sequence can be found below.

**During the second year**

<table>

</tr>
</tbody>
</table>

**Total** 9 course units (or 10 course units for English or mathematics)

**COURSES**

**EFN 299/Schools and Communities**

1 course unit

(every semester)

This course examines the nature and the complex interrelationship between schools and communities in the rapidly changing diverse culture of the United States. Students will be expected to become familiar with different mores, values, belief systems, and attitudes held by various groups in order to understand how the individual is socialized and enculturated in society. Students will develop an informed discourse regarding the philosophical query: What does it mean to be an educator? Through reflection and ethnographic study, students will begin to develop an understanding of their own socialization and will question how this has impacted their own educational experiences and those of others.
Educational Administration and Secondary Education-2

EFN 398/Historical and Political Contexts of Schools 1 course unit
d(every semester)
Through sociological, philosophical, and historical lenses this course explores schools as cultural,
economic, and political institutions. By examining the existing tensions within power relationships that
impact schools on local, state and federal contexts, students develop knowledge of the various discourses
that frame educational issues, subsequently becoming more informed and effective teachers and citizens.

SED 224/Adolescent Learning and Development 1 course unit
d(every semester)
This course is designed for prospective secondary education teachers (serving grades 6-12/serving schools
that are departmentalized). It focuses on adolescent learning and development using diverse frameworks:
theoretical, empirical and practice/policy. It requires prospective teachers to: (a) know and understand
the students they propose to teach in addition to understanding their own development and the contexts of
that development; (b) develop high levels of competencies related to the application and use of the tools
and products of the science of development, specifically, reflection, research and inquiry; and (c) cultivate
in self and exercise leadership and advocacy for youth through participation in a thirty (30) hour
structured field experience.

SED 391/Independent Study in Secondary Education .25–1 course unit
d(every semester)

SED 399/Pedagogy in Secondary Schools 1 course unit
d(every semester)
In this course, students develop the pedagogical knowledge, skills, and dispositions necessary to become
an effective and reflective culturally responsive practitioner. Students learn instructional design,
pedagogical strategies, and various approaches to classroom management. Using “Understanding by
Design” students practice the principles of writing lesson and unit plans by creating a two week unit
assigned by a cooperating teacher in a middle or high school setting. This unit is taught and evaluated by
the cooperating teacher and college professors. This course shares a 100 hour field experience with
content methods courses that are taken concurrently.

SED 470/Selected Topics in Secondary Education .5–2 course units
(occasionally)
In depth study and/or field experience in current or specialized topics proposed by the faculty and
approved by the department.

SED 498/Collaborative Capstone For Professional Inquiry 1 course unit
d(every semester)
This course is designed to promote professional development, problem solving skills, and best practices
during student teaching. Through guided discussion, students analyze pedagogical, classroom
management and bureaucratic problems they encounter in their field placement. In addition, students
continue to hone the instructional and assessment skills they developed in their junior year. Completion
of an inquiry project that assesses the effectiveness of their teaching on student learning and presentation
of the electronic portfolio are the culminating assignments of this course and of the secondary education
program.
