

## SPEECH THERAPY REFERRAL LISTING

Most facilities will want to conduct a speech evaluation before beginning speech therapy. Depending on the results of the evaluation, speech therapy may be recommended. You should check with your insurance provider to verify any co-pays, deductibles or costs to you as well as to verify if speech therapy is a covered benefit before making an evaluation appointment.

Listed below are several providers of speech therapy services. There are additional services listed in the yellow pages under “Speech and Language Pathologists”.
